437-962-2916 ● eshao@my.centennialcollege.ca

A Software Engineering Technology (AI) student preparing for a Co-op or entry-level developer role. Equipped with a foundation in Python, C#, and Oracle SQL, with hands-on experience using Tableau and Excel to create clear data visualizations. Currently expanding practical skills in web application development and AI system design through academic projects and the independent development of 'TimeTracker', a full-stack digital wellbeing application. Bilingual in Mandarin and English, using strong communication skills to help clients better understand the product.

PROFESSIONAL SUMMARY

- Solid foundation of object-oriented programming (OOP) principles and database structures
- Demonstrated ability to build and test full-stack web applications using the Node.js and MongoDB environment.
- Hands-on experience in software requirements engineering, UML modeling, and translating business needs into technical specifications.
- Proficient in Agile methodologies and the Software Development Life Cycle, prioritizing iterative development and comprehensive testing practices.
- Experienced in deploying and configuring local Large Language Models (LLMs) platforms like LM Studio, optimizing execution parameters and context windows for local AI experimentation.
- Programming Languages: Python, HTML/CSS, JavaScript, Linux, SQL, C# and MERN stack.
- Software & Tools: Microsoft Office, Tableau, Visual Studio Code, Microsoft Visio, GitHub, LM Studio, Oracle Database.

KEY SKILLS

Full-Stack Web Development	Database Management System	Agile & SDLC Methodologies
Statistics & Data Visualization	Object-Oriented Programming (C#, Python)	UML Modeling & System Design
Generative AI & Local LLMs		

PROJECTS

Web Application – TimeTracker

- Developed a full-stack digital wellbeing application using **Node.js** and **MongoDB** to track user screen time.
- Designed structured database schemas using **Mongoose** and implemented robust backend routing with

Express.js to securely manage user data.

- Leveraged the experimental Web **Idle Detector API** to monitor system states and processed asynchronous data via backend **RESTful APIs**.

Web Design – Restaurant Website

- Developed a comprehensive restaurant website, including event calendars, interactive menus, and dedicated contact interfaces utilizing HTML, CSS, and JavaScript.
- Integrated a third-party **mapping API** for data and implemented an interactive visual gallery for users to manage favorite items.

EDUCATION

Software Engineering Technology - Artificial Intelligence (Co-op) Advanced Diploma Jan.2026 - Present
Centennial College, Toronto, ON

Courses:	Python Programming	C# Programming	Web Interface Design
	Database Concepts	Linux Operating Systems	Client-side Web Development
	Software Engineering Fundamentals		Software Requirements Engineering
In Progress:	AI Systems Design	Introduction to AI	Java Programming
	Web Application Development		

Bachelor of Management in E-business – Shanghai Sanda University, Shanghai Sep.2019 – Jul.2023

WORK EXPERIENCE

E-commerce Operations Manager – (Taobao), Shanghai, China Jan.2023 - Dec.2023

- Managed daily e-commerce operations in a fast-paced digital marketplace, processing an average of **20+ orders** per week while maintaining strict inventory accuracy.
- Communicated directly with clients to identify their needs, explaining product features clearly and achieving a **93%** positive customer satisfaction rating.
